WORK EXPERIENCE

AVANTICA TECHNOLOGIES   **San Jose, Costa Rica**
Senior QA   **(March 2014 - Current)**

Avantica is a software development company with over 20 years of experience.
During this time I participated in the following projects:

- **Project: Multiple Banco de Costa Rica projects (October 16 – Current)**

  Main tasks executed in the project:
  – Creation and execution of Jmeter load scripts.

- **Project: Avantica Internal QA (August 16 – October 16)**
  This project main purpose was to create a strategy to develop a performance automation training guide to coach coworkers interested in performance.
  Main tasks executed in the project:
  – Creation of the training guide
  – Training peer review
  – Questions clarification

- **Project: Connecture-Performance (March 14 – August 16)**
  This project main purpose was to create and execute performance scripts to test the "Connecture" application to its multiple clients.
  Main tasks executed in the project:
  – Creation and execution of Jmeter load scripts.
  – Results gathering and overall analysis.

Prodigious Latin America.　　　　　　　　　　　　**Alajuela, Costa Rica**
QA II　　　　　　　　　　　　　　　　　　　　**(May 2013 - February 2014)**

The company is known for being a Digital agency, partner with Publicis Group.
During this time I participated in the following projects:

- **Project: Rosetta (May 2013 - February 2014)**
  The project was an e-commerce CRM implemented with Websphere.
  Main tasks executed in the project:
  – Functional and creative testing
  – Bug reporting

Growth Acceleration Partners　　　　　　　　　　**San Jose, Costa Rica**
QA I　　　　　　　　　　　　　　　　　　　　**(January 2012 - May 2013)**

Growth acceleration partners is an agile software development company with their headquarters located at Austin, Texas.
During this time I participated in the following projects:

- **Project: Mobile Department (January 2012 - July 2012)**
  There were multiple mobile projects.
  Main tasks executed in the project:
  – Test case creation, mobile testing, bug reporting, bug verification, regression testing etc.
- **Project: Manticore (July 2012 - May 2013)**
  The project was a CRM were the team needed to automate the functional test cases.
  Main tasks executed in the project:
  – Functional automation using selenium and ASP of the existing test cases
